## Which One Floats?

1) What is the mass of the can of Coke? $\qquad$
What is the volume of the can of Coke? (it is printed on the can) $\qquad$
2) What is the mass of the can of Diet Coke? $\qquad$
What is the volume of the can of Diet Coke? $\qquad$
3) Predict what you will find when you put the cans in the water:
$\qquad$
$\qquad$
4) What did you find when both cans were put in the water?

Record the density of each liquid:
5) Density of Coke: $\qquad$
6) Density of Diet Coke: $\qquad$
7) What did you find when you measured out the sugar vs. the sweetener?
$\qquad$
8) Why do the cans of pop act like they do when placed in water?
$\qquad$
9) How does measuring out the sugar help you understand this?
